

Adam Navarro

UI/UX & Product Designer

 navarro.adamadrian@gmail.com |  adamnavarro.com |  dribbble.com/adamnavarro

About

Product Designer with 8+ years of experience building digital products across **fintech**, **Web3**, **insurance**, **SaaS**, and **marketplaces**. I focus on creating clear, intuitive experiences for complex products — balancing strong UX fundamentals, scalable design systems, and thoughtful visual craft.

I work closely with engineers and stakeholders to translate loosely defined problems into practical, production-ready solutions. My background in computer science means I think through implementation early and collaborate naturally across design and development.

Skills & Tools

Design: UI/UX, Design Systems, User Research, Mobile App Design, Brand Identity

Tools: Figma, Spline, Adobe Creative Suite (including video editing and motion graphics), Jira, Git, Notion

AI Tools: Claude, Cursor, ChatGPT

Languages: English, Filipino

Bonus: Frontend background for faster designer-developer collaboration

Education

BS Computer Science
University of the Philippines (2017)

Experience

HeadstormAI — Senior UX/UI Designer

Oct 2025 - Present

- Work directly with the CEO and growth team on high-impact design initiatives supporting partnerships, sales, and market positioning
- Lead design exploration for the website redesign, defining layout, visual direction, and content hierarchy
- Translate complex AI concepts into clear, compelling visual narratives across decks, web, and growth touchpoints

XLD Finance — Senior UX/UI Designer

Feb 2022 - Sep 2025

- Led end-to-end product design across fintech and Web3 platforms — Central, Payeah, xSpend, and xMerchant — from problem definition through to shipped solution
- Built and scaled design systems across all products, ensuring consistency within regulatory and compliance requirements across markets
- Designed web and mobile responsive flows for regulated financial environments, including constraints around Web3 compliance, KYC, and financial regulation
- Designed internal and admin tools to support operational workflows, improving efficiency for internal teams
- Produced 2D/3D assets for marketing and product, strengthening brand identity across the portfolio

Wunderite — Frontend Engineer / Designer

Aug 2020 - Nov 2021

- Designed and implemented desktop and mobile flows for a regulated insurance web app, streamlining sales and reducing onboarding friction
- Collaborated closely with engineers and PMs, bridging design and code from concept to shipped UI

GoAbroad — Senior Web Designer

Jul 2015 - Aug 2020

- Redesigned GoAbroad's marketplace website, improving navigation and boosting program inquiries
- Analyzed user behavior and usability through metrics including bounce rates and CVR, recommending improvements that increased conversion and reduced friction
- Produced digital and print marketing assets driving traffic from social and email channels
